SeeUnity

An Anaqua Company

SeeUnity has a full suite of comprehensive solutions to help you make the most of your Alfresco environment. Whether you need to migrate all of your content to Alfresco, you are using other ECM systems in conjunction with Alfresco and need to synchronize your content between the two, or you want to integrate Alfresco with another ECM system like SharePoint, we have got you covered!

Integrate, migrate, or synchronize with Alfresco

Fusion Content Integration is a highly configurable web-based application used to conveniently bring together all of a user's critical and relevant content into one place. Provide a native Alfresco user experience that will allow your employees to access and manage content across one or more systems from within a single interface.

Fusion Web Connect

Fusion Web Connect is a configurable web interface that lets you connect your Alfresco content into the front end of your choice. Fusion Web Connect can be configured to display only relevent materials to the case, lead, complaint, or record. Fusion Web Connect not only displays related content, it also extends the native functionalities of Alfresco directly into your web interface so you can view profile, versions and where used, open and edit content, open in Microsoft Office Online, and check in/ check out.

Fusion Search for SharePoint

Perform federated searches from a single interface. Fusion Search for SharePoint is an indexed search application which extends search functionality native to SharePoint and applies it to all of your repositories, like Alfresco, allowing you to search crossrepository by meta-data and full text. Fusion Search for SharePoint also embeds native Alfresco functionalities directly in SharePoint through configurable display templates.

BUSINESS BENEFITS

- Improve ease of access to all of your content

- Increase user satisfaction

- Maintain a single source of truth

- Support information governance plans

- Fuse all content into one interface

- Increase cross system collaboration

SeeUnity Solutions for Alfresco

Velocity Content Migration

Migrating data from one repository can be an arduous process without the right solution. SeeUnity's Velocity Content Migration product has been developed and improved over many years of use in the ECM industry. Our product will help your clients migrate to or from Alfresco, clean up old content, and maintain document compliance in the move; all with an out-of-the-box product that can be used by in-house employees or by specialty consultants. Velocity Content Migration offers flexible configuration to migrate content based on your unique use case. It also allows for C# scripting in the case of a custom requirement.

Echo Content Synchronization

Echo Content Synchronization helps you manage content across your organization's repositories. This is achieved through the easy configuration of archiving, publishing, or bi-directional synchronization of documents, optionally, without any user interaction. Our seamless solution for content synchronization helps ensure consistent RM and IG while reducing risk and effort. Echo Content Synchronization is easily connected to Alfresco and is simple to set up.

Key Features

- Publish documents from your repository of choice to external sources
- Bi-directionally synchronize documents across repositories
- Archive documents to your repository of choice and optionally delete or replace documents with a link or stub
- Map and synchronize metadata and security across repositories
- Configure rules to be initiated based on triggers
- Schedule or automatically manage document synchronization
- Utilize native repository APIs to ensure compliance and maintain audit and history information
