An Anaqua Company

SeeUnity Solutions for Box

Synchronize or Migrate Your Content with Box

SeeUnity has a full suite of comprehensive solutions to help you make the most of your Box environment. If you are using ECM systems in conjunction with Box and need to synchronize your content between the two, we have got you covered.

Echo Content Synchronization is an out-of-the box, easily deployable software solution to enable you to connect disparate software applications and simply or automatically synchronize content for sharing. Connect Box with any of the following systems: Alfresco, iManage Work, Microsoft SharePoint and SharePoint Online, OpenText eDOCS DM, OpenText Content Server, EMC Documentum, IBM FileNet, HighQ, Firmex, FileShares, and Office 365.

Echo Content Synchronization – Key Features

Echo Content Synchronization is a robust synchronization solution to help you automate your content management

- Publish documents from your repository of choice to external sources
- Bi-directionally synchronize documents across repositories
- Archive documents to your repository of choice and optionally delete or replace documents with a link or stub
- Map and synchronize metadata and security across repositories
- Configure rules to be initiated based on triggers
- Schedule or automatically manage document synchronization
- Utilize native repository APIs to ensure compliance and maintain audit and history information

BUSINESS BENEFITS

- Publish documents from your native ECM
- Support IG plans with easy archiving
- Improve user satisfaction with invisible sync
- Increase cross system collaboration
- Reduce time spent on IG and records management
- Easily synchronize data across your organization

SeeUnity Solutions for Box

Enable your Attorneys while Supporting your Clients

Allow your attorneys and paralegals to utilize Box to help with the filesharing and extranet solutions your firm needs, while synchronizing content between Box and your Document Management System (DM) of record. Your content will always be in compliance by allowing you to choose the synchronization type that best suits your needs.

Velocity Content Migration

Migrating data from one repository can be an arduous process without the right solution. SeeUnity's **Velocity Content Migration** product has been developed and improved over many years of use in the ECM industry. Our product will help your clients migrate to or from Box, clean up old content, and maintain document compliance in the move; all with an out-of-the-box product that can be used by in-house employees or by specialty consultants. **Velocity Content Migration** offers flexible configuration to migrate content based on your unique use case. It also allows for C# scripting in the case of a custom requirement
