

SeeUnity Solutions for iManage

DATA SHEET

Optimize your IT investment with API-based migration and integration solutions

Velocity Content Migration is a robust, API-based solution designed with a comprehensive feature set to assist you with the complex tasks needed to complete your iManage migration project on time and without user disruption.

- Legacy system modernization
- On-premise to iManage Cloud uplifts
- M&A database consolidation
- Onboarding new attorney matters
- Large file and bulk exports
- On-premise cloud back-ups

Solutions for iManage – Key Features

- Supports on-premise, hybrid, and cloud migrations
- Configurable and reusable migration templates
- Advanced mappings for metadata, permissions, and more
- Optional C# scripting
- Custom Translations
- Source data validation and clean-up with duplicate document detection across multiple sources
- Preservation of workspace structures, folders, and original document numbers
- Delta syncs, scheduling, and automation
- Error reporting and batch error processing
- Rollback action options
- Ability to create matter-centric workspaces in target repository

BUSINESS BENEFITS

- Save hours of scripting time using repeatable templates to map content and metadata to your target
- Streamline the migration reconciliation process with clear insights from in-depth reporting and error processing
- Optimize your new IT investment's environment with Velocity's data discovery, clean-up, and data transformation capabilities
- Delta syncs enable users to continue working without disruption or downtime
- Ensure business continuity and disaster recovery with on-premise cloud back-ups

Working Behind the Scenes to Improve Productivity

Content Integration Solutions

Echo Content Synchronization is an API-based enterprise content synchronization product that enables you to connect and synchronize data between iManage and other external applications.

- Securely sync content one-way or bi-directionally between iManage and other vital business applications
- Configure administrator or user initiated sync rules
- Advanced mappings for workspaces and metadata
- Schedule and automate content syncs
- Auditing, reporting, and error handling
- Automated rule and sync template creation

Echo Automate is a powerful Echo Content Synchronization product add-on designed to automate provisioning of content sync rules in your organization. Automate the process of linking your iManage Workspace matters with corresponding MS Teams sites and initiating two-way content synchronization, for example.

- Automate the process of managing the entire life cycle of meta-rules

- Configure automated meta-rules with Echo Automate Templates
- Manage meta-rules & rules created from them via Echo
- Automate UI
- Optional email error reporting
- Schedule, manually run, suspend meta-rules, and more
- Retain audit history & run detailed reports

Fusion Content Integration is a highly configurable web-based application used to dynamically display relevant iManage content across systems.

- Real-time access to relevant iManage content
- Configurable layouts/templates
- Securely surface iManage content via Tabs
- Native iManage functionality: Browse, access, search, manage, and edit iManage content directly from single UI
