

## Enable Efficient Workflow with End-to-End Governance

With many of us working remotely, it's challenging to maintain control over your content. We're helping organizations integrate their DMS with Microsoft Teams, OneDrive, and SharePoint to streamline processes for their users and provide secure collaboration without sacrificing governance.

### Fusion Content Integration

**Fusion Content Integration** is a highly configurable web-based application used to dynamically display DMS content relative to your specific Teams, OneDrive, or SharePoint site.

### Key Features

- ✓ Real time secure access to relevant DMS content based on the context of the team
- ✓ Configurable layouts/templates
- ✓ Securely surface DM content via Tabs
- ✓ Native DMS functionality: Browse, access, search, manage, and edit DMS content directly from Office UI

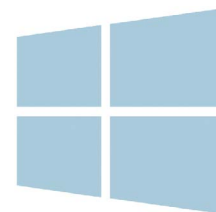

### Business Benefits

- Enable productive collaboration with secure integration
- Work efficiently by accessing all relevant data via a single user interface
- Workflow is streamlined, saving time and speeding up business processes
- Maintain Information Governance initiatives by keeping content in the repository of record

*"What truly differentiates SeeUnity's solutions from other options out there is the ability to effectively govern and manage content that is created in a Team and sync or archive that content to a DMS like iManage or NetDocuments."*

- Gene D'Aversa, Director of Project Management IT, Husch Blackwell

## Working Behind the Scenes to Improve Productivity

### Echo Content Synchronization

Echo Content Synchronization is an API-based enterprise content synchronization product designed to automate processes, support internal and external collaboration, and help maintain Information Governance. Work natively in Teams while synchronizing content back to your DMS with automatic admin sync, user sync, and archiving.

### Key Features

- ✓ Securely sync content from your DMS to Teams, OneDrive, or SharePoint
- ✓ Supports one-way or bi-directional synchronization
- ✓ Configure administrator or user initiated sync rules
- ✓ Advanced mappings for workspaces and metadata
- ✓ Configure rules to be initiated based on triggers
- ✓ Schedule and automate content syncs
- ✓ Auditing, reporting, and error handling
- ✓ Automated rule and sync template creation

### Business Benefits

- Simplify workflow and improve productivity by securely integrating Teams, OneDrive, or SharePoint with any DMS
- Automate processes to free up valuable IT hours
- Enable efficient and secure content collaboration with colleagues, clients, and external counsel
- Maintain IG and compliance with full administrative oversight
- Allows users to interact natively in the DMS (search, edit, create, update metadata, etc.)
- Improve adoption by allowing users to work in their system of choice while keeping content synchronized and up to date
- Future-proof your technology investments with a scalable solution designed to grow with your organization
- Control and maintain storage costs
