

Large-scale Content Migration  
Database Consolidation  
Lateral Attorney Moves  
On-premise Cloud Back-up

## Solution Overview

**Velocity Content Migration** is a robust, API-based enterprise content migration solution. Designed with a comprehensive feature set, Velocity is built to assist you with the complex tasks needed to complete your migration project on time and without user disruption.

## Key Features

- ✔ Supports on-premise, hybrid, and cloud migrations
- ✔ Configurable and reusable migration templates
- ✔ Advanced mappings for metadata, permissions, and more
- ✔ Optional C# scripting
- ✔ Custom translations
- ✔ Source data validation and clean-up
- ✔ Duplicate document detection across multiple sources
- ✔ Preservation of workspace structures, folders, and original document numbers
- ✔ Delta syncs
- ✔ Error reporting and batch error processing
- ✔ Rollback action options
- ✔ Migration scheduling and automation
- ✔ Ability to create matter-centric workspaces in target repository

## Business Benefits

- Save hours of scripting time using repeatable templates to map content and metadata to your target
- Streamline the migration reconciliation process with clear insights from in-depth reporting and error processing
- Optimize your IT investment with Velocity's capabilities for data discovery, clean-up, and data transformation
- Delta syncs enable users to continue working without disruption or downtime
- Promote growth and scalability for your organization with Velocity's expansive list of connectors

# Velocity Content Migration

**Working Behind the Scenes  
to Improve Productivity**

## **Uplift or Migrate On-premise to Cloud**

Clean-up content, transform data into matter-centric workspaces, or simply uplift content directly to the cloud without the need for staging.

## **Legacy System Modernization**

Moving to a more efficient system? Need to gain control over file shares? Use Velocity for data discovery, clean-up, and data transformation to make the most of your new environment.

## **Consolidate Databases M&As**

Get up and running as one unified organization quicker by utilizing Velocity to consolidate critical databases; multiple on-premise instances or cloud databases.

## **Onboard New Attorney Matters**

Save days importing new attorney matters and merging the files with the proper internal ID's and metadata specific to your firm.

## **Large File and Bulk Exports**

Process outgoing attorney matters and documents in a fraction of the time using Velocity's highly configurable metadata mapping and detailed reporting.

## **On-premise Cloud Back-ups**

Solutions for your organization's disaster recovery, business continuity, and continuous access to your cloud content.
